

Literature As Exploration

Louise Rosenblatts *Literature as Exploration* has influenced literary theorists and teachers of literature at all levels. This attractive trade paperback edition features a new foreword by Wayne Booth, a new preface and retrospective chapter by the author, and an updated list of suggested readings. In *Literature as Exploration*, Rosenblatt presents her unique theory of literature and focuses on the immense, often untapped, potential for the study and teaching of literature in a democratic society. The authors philosophy of literature is frequently cited as the first presentation of reader-response theory, but she differs from her successors in emphasizing both the reader and the text. Her transactional theory of literature examines the reciprocal nature of the literary experience and explains why meaning is neither in the text nor in the reader. Each reading is a particular event involving a particular reader and a particular text under particular circumstances. And teachers of literature, Rosenblatt argues, play a pivotal role in influencing how students perform in response to a text.
