

Something Furry Underfoot

If you ever wondered how hedgehogs mate, how many ferrets it takes to destroy a potted plant, or whether its possible to raise a domestic duckling in a house with two dogs and a formerly stray cat, this book answers those questions and more. This humorous, touching memoir shows a hapless suburban woman caring for, and falling for, frogs, iguanas, hedgehogs, ferrets, dogs, a stray cat, rescue rabbits, a domestic duckling, hamsters, gerbils, mice, guinea pigs, mynah birds and tropical fish. Filled with tips about pets and the spouses that love pets, this book is also a pet primer. ConsiderTip #29: Rodents will chew whatever is handy to chew on. Its a tip that precedes the author discovering a gerbil had chewed through its plastic cage and was hanging out on the refrigerator coils.Tip 21: Some men take the neutering of their dogs personally precedes a hilarious scene at the veterinarians where the author is berated for insisting that her husbands beloved Dusty, the Angel Pup, kiss his manhood good-bye. The overall message of this book is captured in a YouTube video called What Animals Deserve:
